

## A short presentation of DELPRO

### History & Facts

DELPRO is a Danish based independent service provider and installation company specialized in high and medium voltage works and mainly serving the electrical power industry. DELPRO was founded in the year 2000 and has approx. 175 employees at our four Danish branch offices and in the UK and Poland.

### Business areas

Installation and Maintenance of:

- ✓ Power Systems (Substations, Cables and Overhead lines)
- ✓ Wind farms (on- and offshore)
- ✓ Industry & Rail
- ✓ Data Centres

Our Wind activities are placed in the company DELPRO Wind, which is a joint venture together with Global Wind Service.

The main activities of DELPRO are related to electrical installations in the voltage range between 10 kV and 400 kV.

During **installation** we will handle all aspects of mounting, testing and commissioning of the installation.

When performing **maintenance**, we will carry out preventive maintenance, troubleshooting, replacements and retrofits. At DELPRO we are prepared 24/7.

### Customers

- ✓ Electrical Utilities
- ✓ Wind Farm Owners and Turbine Manufacturers
- ✓ Power Plants
- ✓ HV Component Suppliers
- ✓ Industrial Enterprises
- ✓ Railway Construction Companies

### Safety first

At DELPRO we care of our employees and we put safety first; we are proud to be certified according to ISO 9001, ISO 14001 and ISO 45001.
